

## HOW TO IMPORT A SHAPE FILE (.SHP) IN MAPINFO GIS SOFTWARE ?

To open a Shape file in the MapInfo GIS software, you have to follow these steps:

1- Click on 'Universal Translator' under 'Tool' menu

2-

Choose the format : ESRI Shape

Where the shape file comes from

Choose the projection

Choose the format for the new file

Choose the destination folder for the new file

Let the Log part in default

3- Click 'ok' to complete the process.

The extensions for GIS software MapInfo will be created and saved in the destination folder you have chosen.
